

Cat and Bird presents “Real Rice”

Turn virtual rice into REAL rice to feed real people!

Dunedin, December 16th, 2017 - Cat and Bird today release their revolutionary, charitable new game, “Real Rice”. Unlike most games that benefit only the player and game developer, Real Rice allows the player to directly award their in game produce to people in need around the world!

Plant and tend to virtual rice in the game for free, and when it is time to harvest, send the rice out of the game, where it is converted by the Cat and Bird team into real donations made to the World Food Program. Revenue is created by in game purchases and advertising.

Real Rice for Android is now available for free download from Google Play. Coming soon to iOS. For more information please visit <http://realricegame.com/>
